

MCL

Led Strip

Our new knitted-pattern professional-class neon products utilize advanced flexible LED technology to deliver precise and uniform illumination with distinctive aesthetic effects. Engineered and manufactured under stringent quality control standards, these luminaires undergo comprehensive testing to ensure long-term reliability and performance. The flexible knitted-pattern structure allows for easy customization and adaptation to complex architectural geometries, suitable for both indoor and outdoor applications. Their robust construction provides mechanical durability and environmental resistance, including protection against moisture and temperature fluctuations. Compatible with a wide range of control systems, these neon products support dynamic lighting scenarios and integration into sophisticated lighting networks. Ideal for modern and retro design implementations, they enable designers to realize complex visual concepts with high precision and efficiency.

MCL

| Code | Luminous Flux | LEDs / Meter | System Power | Weight |
|------|---------------|--------------|--------------|---------|
| MCL | 20 lm/W | 50pcs | 3.2W/m | 180gr/m |

PCB Material: Flexible
Copper

Voltage: 5VDC
Beam Angle: 360°

Color Temperature: RGB Magic

20mm
