

TUNEX

Exit and Emergency

Designed to provide clear and reliable guidance during emergencies, this double-sided emergency exit luminaire offers high visibility from different viewing angles. Its durable housing ensures long-lasting and reliable performance under demanding conditions, while the double-sided design provides flexible installation and effective wayfinding. Clear and easily recognizable symbols and directional signs make emergency exits easy to identify, helping occupants navigate safely when it matters most. Designed especially for use in tunnels and industrial areas, the luminaire provides a reliable lighting solution for safe evacuation and effective emergency wayfinding.
